

Quality Policy

ATSYS is an established engineering consultancy providing world class engineering solutions to customers to improve production and enhance business performance.

As a primary obligation, ATSYS is committed to meeting the needs and expectations of our customers by the capable implementation of world's best practice. This is achieved by:

- engaging suitably qualified, skilled and experienced people
- educating and training our people in order to continually improve their skills
- establishing management procedures to ensure that customer expectations are met and that all statutory and compliance processes are followed
- identifying, reporting, investigating and resolving any non-conformance identified and taking action to prevent a recurrence
- establishing, reviewing and communicating performance measures and taking action to improve outcomes
- monitoring and evaluating the performance of engineers, sub-contractors and suppliers, and implementing effective communication with them

To achieve this ATSYS has developed and implemented an Integrated Management System which complies with the requirements of ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018. Quality, environmental and safety objectives are established and regularly monitored through management meetings and formal management review to facilitate continual improvement.

ATSYS is committed to the continual improvement of the Quality System to achieve and maintain a level of quality, which enhances the company's reputation with clients.

This Quality Policy and the Integrated Management System that has been implemented are fully supported by management and it is the responsibility of staff to ensure they are understood and implemented at all levels within ATSYS.
